Supplier qualifications

Capability statement

Shinra Consulting designs and delivers custom software from Pontiac, Michigan. We take on complete builds, lead platform replacements and deliver integration work alongside an existing team.

Scopes we deliver

- Product discovery, mockups, prototypes and first releases
- B2B and consumer products, internal software and integrations
- Legacy modernization, partner APIs and embedded technical leadership

Selected team experience

A logistics company runs its operations on a platform designed by a member of our team. Its first software product for outside customers secured $15 million in annual committed revenue.

Our team's integration experience includes payment processing software for 50 or more client organizations and APIs that helped a healthcare nonprofit streamline at least 10,000 sonographer recertifications.

Selected projects and experience

Delivery team

A senior architect leads each engagement. For a prime or internal engineering team, we can own a partner API, a data migration or a product release through handoff.
