Capability statement

Custom software design, implementation, and modernization for business owners, technology teams, agencies, and prime contractors.

Services

- Product discovery, user workflows, mockups, and working prototypes
- Internal business tools, B2B and consumer applications, integrations, and reporting
- Legacy modernization, architecture reviews, and deployment planning
- Embedded technical leadership and ongoing application development

Delivery team

Founder Charles Napierala leads architecture and delivery. Shinra brings in senior engineering and product specialists according to the scope. We identify the proposed team and responsibilities in the response.

Relevant experience

Shinra built an internal business application and worked directly with its users to prioritize changes. In earlier roles, Charles built manufacturing dashboards, developed mortgage processing software, and led work on financial API integrations.
